

End-to-End Digitization for Airport Parking

Airport parking is a carefully orchestrated system, where the operator has to closely monitor thousands of vehicles to make sure everything flows smoothly from entry to parking spot to the exit.

At Get My Parking, we've optimized our smart parking platform to automate and streamline airport parking. Our solutions have streamlined parking in 25 airport car parks across the world.

The GMP platform is capable of helping you remotely manage more than just parking, with its capabilities extending to app-less transactions, detailed parking analytics and reports, advanced AR-Permit automations and a powerful consumer support system.

Set up online reservations for parking.

Enable online parking reservations at your airport car park through a white-labeled consumer app. Travelers can book spots in advance, create and manage sessions, and pay online for a lightning-fast parking experience.

- ✔ Tailor-made with your brand colors
- ✔ Easy navigation to the car park
- ✔ View car park details and rate structures
- ✔ Manage vehicles and payment methods
- ✔ Apply retail validations and save up

Customizable for short term visitors

For short term parkers who are just passing by for pick-ups or drop-offs, downloading a parking app can be quite a commitment. With GMP QR, parking is app-less, cash-less and convenient.

- ✔ Scan a QR to start a session
- ✔ Get a white-labeled web app
- ✔ Sign up with just a phone number
- ✔ Pay online using any method
- ✔ Easy to set up and maintain

Permits perfected for long-term parkers.

Airports have a large number of long-term parkers, including regular travelers, airport staff, retail employees, cab drivers, logistics vehicle operators etc.

The Get My Parking platform comes with a robust permit management system that automates and digitizes your parking contracts, making things simpler for both you and your parker.

- ✔ A white-labeled web app for parkers to manage permits, payments and cars
- ✔ Parkers can set up corporate or business profiles to use employee permits
- ✔ Customizable Flexi-permits for parkers with a hybrid work schedule
- ✔ Prevent overcharging for parking with daily, weekly and monthly maxims
- ✔ Automate and streamline invoices and bulk permits with self-serve AR portals

Digitize fleet parking at your airport.

Everyday, countless vehicles pass through airport parking lots as part of fleets of taxis, rental cars and large carriers. Get My Parking solutions are optimized to provide fleets with halt-free access without the hassles of payment.

We have integrations with car rental companies like SIXT and Miles so that their vehicles can breeze in and out of airports.

Pre-sell parking to fleets

Fleets can purchase pre-paid parking time or permits in bulk and offer cars with pre-paid parking to their contract drivers.

Ticketless entry and automatic payments

Our system identifies fleet vehicles by their license plate and automatically grants them access. Fleet drivers don't have to worry about managing their accounts or payments.

Quota management for multiple fleets

Make sure your parking spots are distributed optimally among the different groups of visitors in your car park! Set up quotas for each user group or fleet.

Set up error-free barriers with expert back-up for support.

No one wants to miss a flight because of a queue for parking, which is why you need halt-free, lightning-fast access combined with reliable and risk-free gate management in your airport parking lots.

GMP Access is an IoT GateKit that fits seamlessly with your existing gates and automates them to be smarter and faster.

Set up lightning-fast access

- Set up touchless, cashless payment methods
- Plug N Play installation in just four hours
- LPR, RFID or Reverse QR technology
- Supported by a white-labeled parking app

Control everything remotely

- Take remote control of your offline barrier gates
- 24/7 customer support backed by a team of experts
- Up your security with account-specific access restrictions
- Powerful reinforcement APIs to abide with security standards
- Set up hassle-free payments for nested car parks

Control all your locations from one place.

Keep track of every parker, vehicle and session in your airport with a powerful dashboard.

- Organizes your parking data into infographic reports
- Track parking trends across your portfolio with critical alerts
- All consumer details at your fingertips to provide quick resolutions
- Create retail validations, rate structures and permits
- Prioritizes data security, with a GDPR-compliant data infrastructure.
- Customize hierarchical access to each module

A white-labeled solution handmade for you.

Set up a custom-branded parking app. Build your brand as an airport parking operator, attract loyal parkers with app referral schemes and boost your revenue.

Tailor-made with your brand colors

Your cross-platform app comes custom-branded with your brand theme, colors and features of your choice.

Packed with features

Parkers can view car park rates, reserve spots in advance and navigate to the airport using the app. It also lets them add and manage cars, cards and employee parking privileges.

On-demand API Integrations

Customize your app with API integrations. Link to third-party portals where you offer other airport services.

Your data is safe with us

Your data is securely stored in an encrypted, GDPR-compliant data infrastructure.

Make your airport future-ready.

Airports need to meet the demands of a rapidly changing mobility industry, especially as epicenters of large-scale logistical operations. From EV Charging to automated valet facilities, make sure your airport is set up with cutting-edge parking technology.

Boost your EV charging services

Offer your EV charging services on your airport parking app.

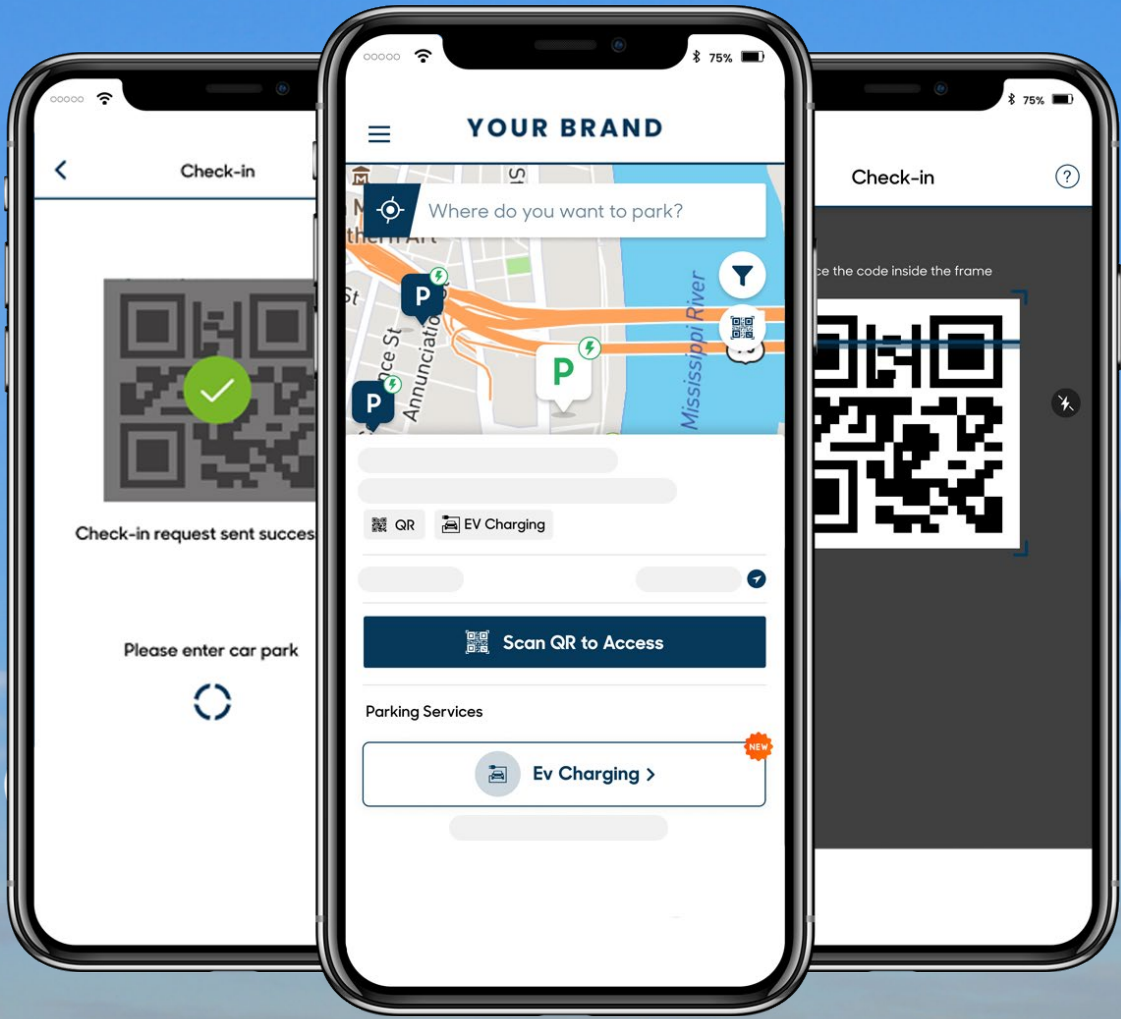

- ✔ Users can easily find chargers
- ✔ Scan a QR to pay online
- ✔ Real-time reports on energy usage
- ✔ OCPI-compliant solutions

Say hello to automated valet parking!

With automated valet parking (AVP), parkers can drop their car off in the designated area and their vehicle will park itself in a free spot. Our platform has successfully deployed AVP in collaboration with the Mercedes Me app at the Stuttgart Airport.
